This diagram shows the completed robot assembly. The main body is constructed from blue Technic beams. It features two large orange wheels at the rear and two smaller white wheels at the front. A red sensor unit is mounted on the front. A blue beam extends from the front towards the rear, supporting a green sensor unit. The robot is shown from a side-on perspective, highlighting its compact and functional design.

CRANE: The first construction cranes were invented by the Ancient Greeks and were powered by men or beasts of burden, such as donkeys.
