Connecting Pegs

To construct with Laser Pegs®, slide two pieces together to form a connection. Slide each piece on and off smoothly.

POWER BLOCK

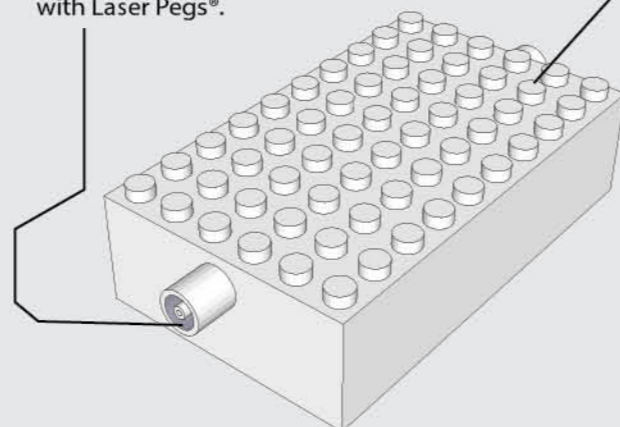

The Power Block is a Power Base that allows you to build with Laser Pegs® and construction parts to build models that light up. It is battery operated. (BATTERIES NOT INCLUDED.)

Laser Pegs® Connections

Allows you to construct with Laser Pegs®.

Construction Part Connections

Allows you to connect to other construction kits.

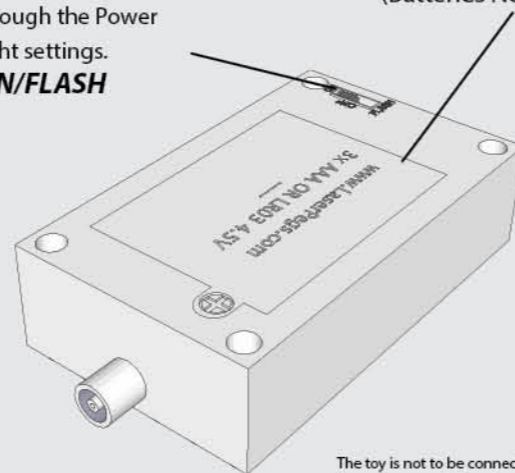

Power Switch

Move the Power Switch to cycle through the Power Block light settings.
OFF/ON/FLASH

Battery Compartment

Requires 3-AAA Batteries (Batteries Not Included)

LIGHT SETTINGS

OFF - Turns lights OFF
ON - Turns lights ON
FLASH - Makes lights FLASH

The toy is not to be connected to more than the recommended number of power supplies

**WARNING: STROBE LIGHTS
MAY CAUSE SEIZURES**

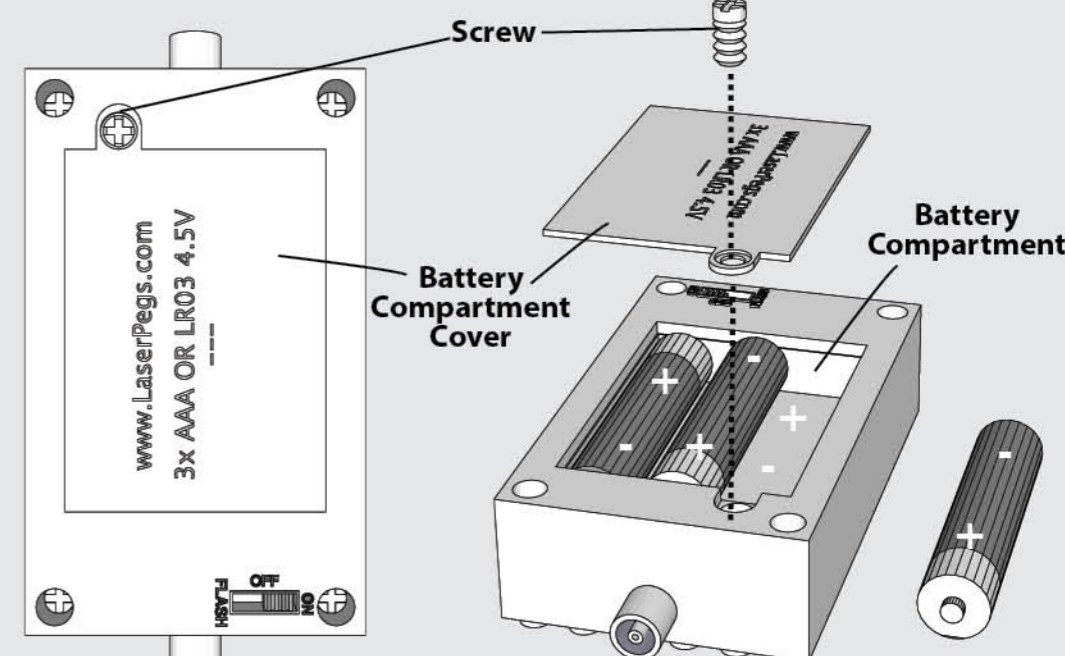

WARNING! Each Laser Peg® draws current from the batteries. Therefore, the more pegs you use, the quicker you will deplete your battery power! As the power weakens, the current will slowly fail and some Laser Pegs® will illuminate (typically the reds and yellows) and some won't. When the Laser Pegs® dim, the Laser Pegs® are not broken, they just need stronger batteries. You have 2 simple options...

1. Change the batteries.
2. Use high quality batteries. They will last a little longer, but they will still deplete rapidly the more Laser Pegs® you connect!

Replacing Batteries

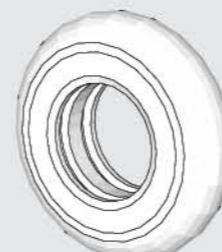

1. Remove Screw.
2. Lift off Battery Compartment Cover.
3. Place three (3) AAA batteries in the correct position - as displayed inside of the Power Block.
4. Replace Battery Compartment Cover and Screw.
5. Slide Power Switch setting to OFF/ON/FLASH.
6. Do not mix old and new batteries.
7. Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium, NiMH) batteries!
8. Exhausted batteries are to be removed from the power base.
9. Never connect more than 30 Laser Pegs® at one time!
10. Non-rechargeable batteries are not to be recharged.
11. Rechargeable batteries are only to be recharged under adult supervision.
12. Rechargeable batteries are to be removed from the toy before being recharged.
13. Batteries are to be inserted with the correct polarity.
14. The supply terminals are not to be short-circuited.
15. DO NOT THROW BATTERIES INTO FIRE!

Remove the Phillips head screw with a 4mm screw driver.
Requires 3-AAA Batteries
Batteries NOT Included

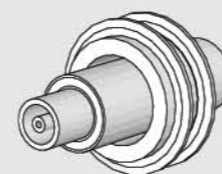

Requires 3-AAA Batteries

Connecting the Laser Pegs® Tire to the Axle Peg

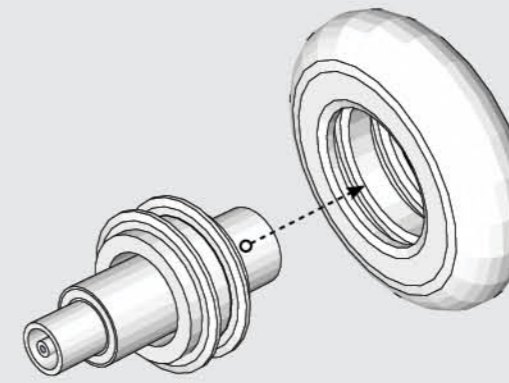

Tire

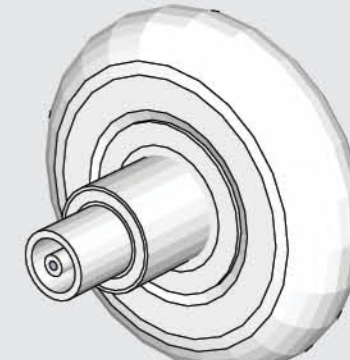

Axle Peg

Place Axle Peg through the Tire

Tire Peg

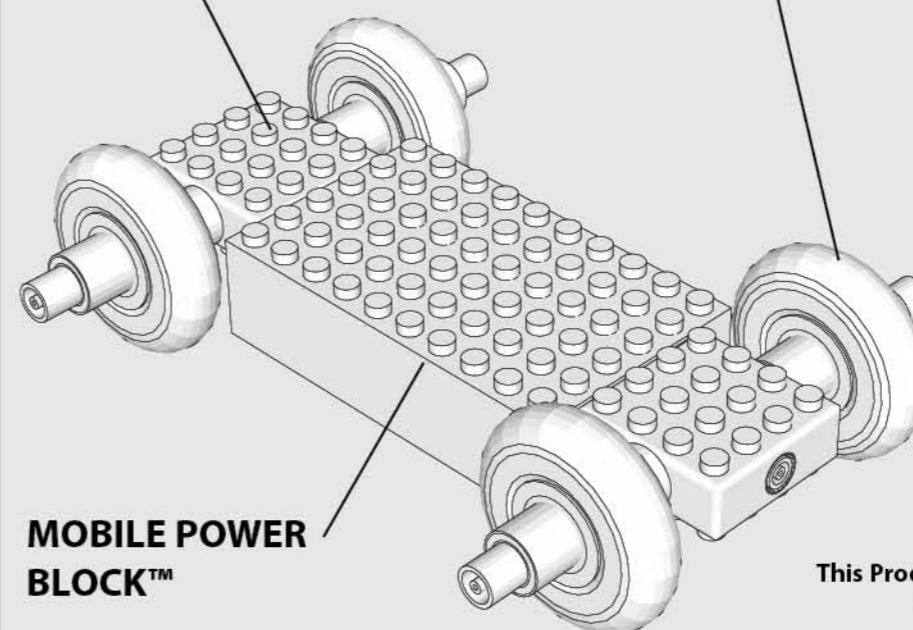

POWER BLOCK™

Use the Laser Pegs® Square M-M Peg to attach the Tire Pegs to the Power Block™.

Laser Pegs® Square M-M Peg

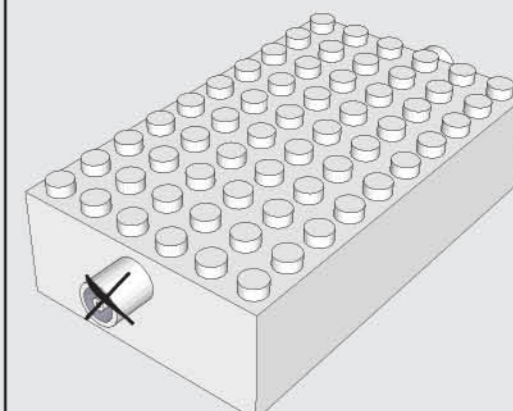

Tire Peg

MOBILE POWER
BLOCK™

AVOID DAMAGE TO PEG HOLES

*To avoid short-circuits, keep metal objects and other unauthorized materials from obstructing the peg holes.

Never connect more than 30 Laser Pegs® to the Power Block at one time.

This Product contains a button battery. If swallowed, it could cause severe injury or death in just 2 hours. Seek medical attention immediately.

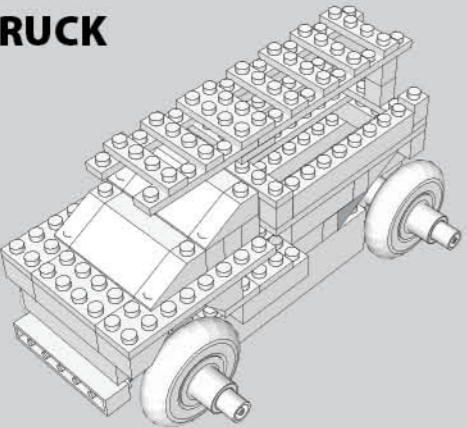

UTILITY TRUCK: A vehicle that is designed to carry equipment, ladders, etc., with more effectiveness than a general-purpose vehicle.

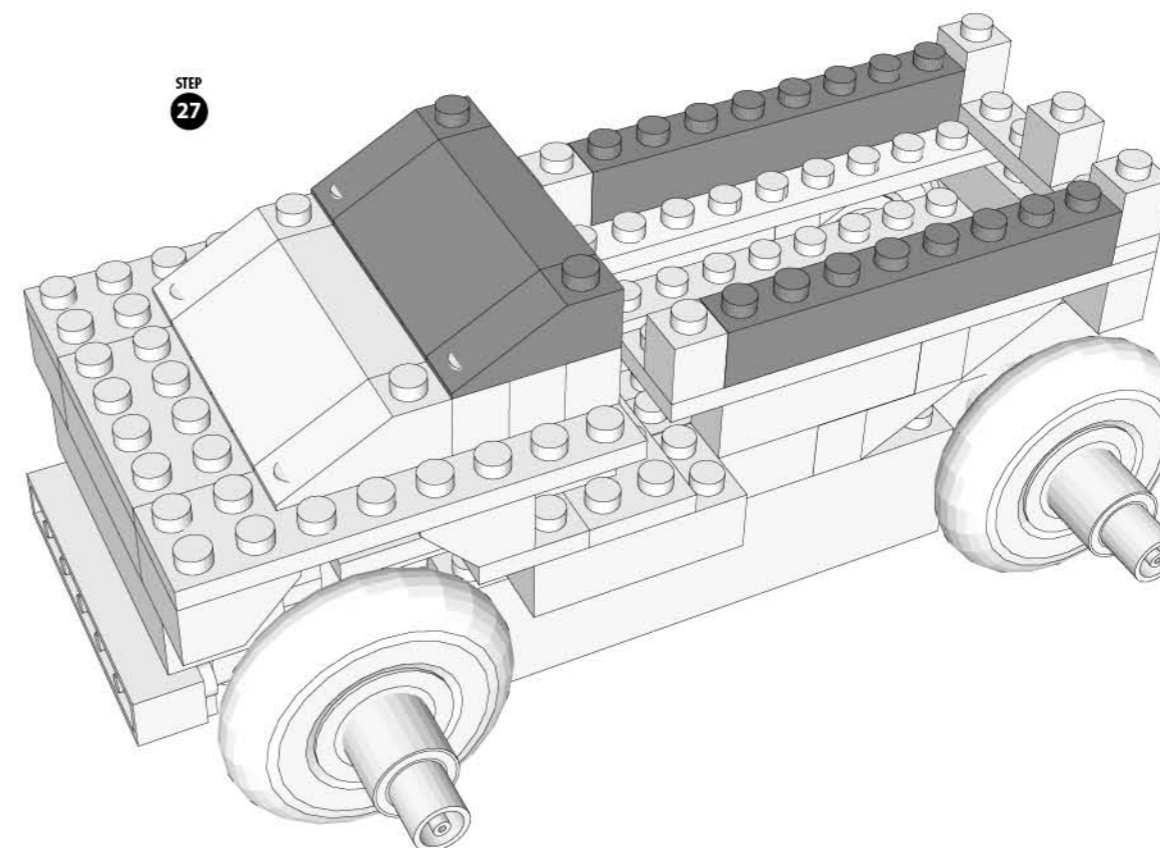

Diagram illustrating the assembly of the rear chassis and wheels. The structure is built using a combination of grey and black Technic beams and connectors. Two large wheels are attached to the rear axle, which is supported by a central pivot point. The assembly is shown from a perspective view, highlighting the structural details and the placement of the wheels.
